

CORTINA Cod.5091

The wide-width curtain fabric CORTINA combines a light, semi-transparent ground with a wide stripe in a denser and textured weave. The ground lets daylight filter gently through the material, creating a balanced contrast with the stripe woven with a fuller yarn where the wool brings softness and volume and defines the fabric's character. Presented in five tonal variants grounded in natural tonalities, CORTINA can be used horizontally or vertically, allowing for different visual interpretations.
